OneVision to Showcase Powerful Software Solutions at London's Fourth Annual Publishing Expo

Booth #A190 will house OneVision's latest flagship solutions for the publishing industry

Regensburg, Germany, January 26, 2009 – OneVision, a global provider of prepress and premedia software solutions to the printing and publishing industries, will be exhibiting some of its most recognized software solutions for the publishing industry at London's Fourth Annual Publishing Expo, February 11-12, Booth A190, at the Olympia 2 Exhibition Centre. This year's event will feature a special focus on the national and regional newspaper publishing sectors.

At the expo, OneVision will display its latest products including Voyager, Contenio, Amendo and Mirado, which are designed to meet the specific prepress needs of publishers, commercial printers and digital printers. Voyager enables convenient, 24/7 online file transfer and approval. Contenio automatically preflights animated and regular online ads, while Amendo automatically enhances images. Mirado makes it possible to transition and reuse print files for immediate use on the Web.

The current versions of Asura and Solvero will also be demonstrated at the event. With these flagship solutions, users have the ability to generate colour-optimized, print-ready files in only one production step. Also featured will be PlugINKSAVEIn, which allows printers and publishers to significantly reduce their ink consumption by replacing expensive CMY ink with less expensive black (K) ink without affecting image quality or appearance.

"For over a decade, OneVision has developed software solutions that enable printers and publishers to produce magazines and newspapers in a more time-efficient and cost-effective manner," said Barry Tweddell, Regional Sales Director for UK at OneVision. "Throughout the year, we re-evaluate our software products and assess how they are meeting the demands of the marketplace, and then proceed to make improvements based on the needs and challenges faced by our clients – no matter their size or their publishing focus. Attending the Publishing Expo in London gives us the opportunity to demonstrate to our current and potential customers how our newest innovations for the publishing industry can streamline their prepress and premedia processes."

OneVision's software is used by many of the world's leading printing and publishing companies. In the United Kingdom, OneVision clients include Financial Times, Yorkshire Web, The Daily Telegraph, Scottish Provincial Press, Incisive Media, National Magazine Co., Northcliffe Press, The Scotsman, Warners Midland plc and many others.
