

Speedflow^{basic}

Speedflow Basic consists of two modules that complement one another:

Speedflow Check can check PDF, PostScript, TIFF, and EPS files and repair errors automatically. The files are output as PDF files.

Speedflow Edit offers full support of WYSIWYG and allows editing and optimizing of text, images, graphics and color in PDF files.

Speedflow^{impose}

Speedflow Impose is One-Vision's powerful JDF compliant imposition software for PDF files at commercial, digital and web printing.

Speedflow^{suite}

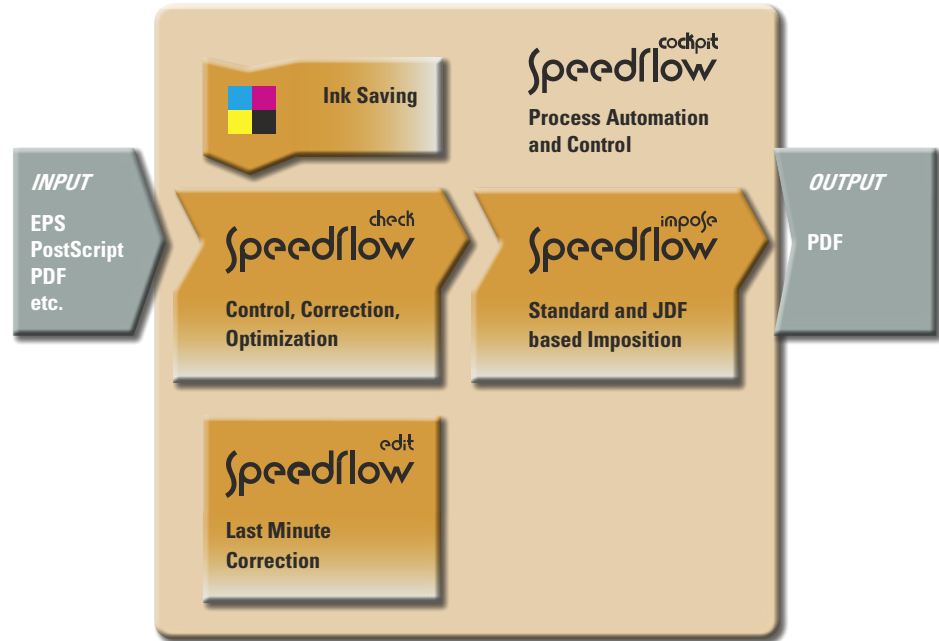

Speedflow Suite consists of Speedflow Basic and Speedflow Impose.

Speedflow^{cockpit}

Speedflow Cockpit can integrate with common and interactive production applications and allows a networked production through OneVision's JDFnet technology.

ONEVISION SPEEDFLOW

HAVE POWER OVER YOUR PDF

YOUR BENEFITS

- Networked, comprehensive and efficient workflow control
- Automatically corrected and optimized PDF documents
- Most likely the world's most comprehensive PDF editing
- Fast and easy (auto)imposition
- Significant reduction of manual processes
- Valuable time savings and cost reductions
- Fewer bad run discounts & fewer reprints at your expense
- Fewer machine downtime
- Extended lifecycle of actual production equipment
- Detailed PDF Error Report with visualization of problematic elements

SPEEDFLOW PRODUCT RANGE ...

- Adaptable to any workflow and used by any market that handles prepress files
- Catches problem files before they cost time and money
- Speedflow Check checks against more than 80 of customizable check options and generates a new structured clean output file
- Can write a lower version of PDF than the original so that older equipment can be used without the need to upgrade.
- Offers enhanced color control options: Automatic TAC detection and ink coverage reduction, rich black removal and extended automatic grey detection.
- Support formats like PDF 1.4 (e.g. transparencies), PDF 1.5 (e.g. layers), PDF 1.6 (e.g. CID fonts) and PDF 1.7 in import and export
- Speedflow Impose can create JDF job tickets, allowing imposition to occur at the RIP, providing additional time for last-minute corrections and reduced network traffic. Speedflow Impose is tested with Harlequin RIPs and Fuji Celebrant RIPs
- Auto-Impose with JDF ticket in Speedflow Cockpit: Instead of using templates, all settings for the JDF ticket can be configured within the Speedflow Cockpit user interface
- Speedflow Check is available for Windows* (incl. Windows Vista Business)
- Speedflow Edit is available for Windows* (incl. Windows Vista Business) and on Mac OS X (from 10.4.11 onwards) on Power PC and Intel based Mac systems
- Speedflow product range has a proven track record for reliability in prepress production workflows

EFFICIENT PRINTING PRODUCTION WITH ONEVISION'S SPEEDFLOW

"Speedflow files drive both our Heidelberg litho presses and our digital machines", explains Rob Hunter, Ken Girvan's Prepress Manager. "It ensures the accuracy of the files. Common errors we were experiencing in the past (...) are now automatically corrected by the Speedflow software. Press downtimes have been drastically reduced and we now lose only a fraction of the plates in comparison to our pre Speedflow days."
